

Sri Vaishnavi Devarashetty

Analytics Manager | Business Intelligence Lead | Data-Driven Decision Making

Hyderabad, India · +91 9703460032 · srivaishnavi.devarashetty@gmail.com · linkedin.com/in/srivaishnavi

PROFESSIONAL SUMMARY

Analytics and Business Intelligence professional with 12+ years of experience leading data and reporting initiatives across global enterprises including Apple (Wipro client engagement) and NVIDIA. Proven record of building Tableau-driven dashboards, optimizing SQL and Snowflake data pipelines, and translating complex business questions into measurable analytics outcomes. Skilled in mentoring analyst teams, partnering with cross-functional stakeholders, and applying modern AI-assisted tools to accelerate reporting and decision-making.

CORE SKILLS

Business Intelligence & Visualization: Tableau (advanced), Tableau Server, Crystal Reports, SSRS, dashboard design, KPI scorecards, data storytelling

Data & Query Languages: SQL (Snowflake, MS SQL Server, MySQL, PostgreSQL), Python, Visual Basic

Data Platforms & Cloud: Snowflake, Google Cloud Platform (GCP), Google Analytics

Analytics Practices: ETL development, data modeling, data warehousing, reporting automation, performance tuning, data governance, predictive analytics fundamentals

AI-Assisted Productivity: ChatGPT, GitHub Copilot, and Claude for SQL acceleration, dashboard documentation, and analysis support

Methodologies & Leadership: Agile, Scrum, stakeholder management, cross-functional collaboration, team mentorship

PROFESSIONAL EXPERIENCE

Assistant Manager – Analytics | Wipro Limited (Client: Apple Inc.) | Hyderabad, India

Feb 2023 – Present

- Lead Tableau-based learning and development (L&D) analytics for Apple's internal learning platforms, building dashboards that track course completion, learner engagement, and program effectiveness across global audiences.
- Designed and deployed advanced Tableau dashboards that improved user satisfaction by 20% and reduced content delivery costs by 10%.
- Integrated Tableau with multiple learning data sources, cutting data processing time by 30% and improving the learner-experience reporting cycle by 15%.
- Engineered high-impact reports for L&D programs, boosting course completion visibility by 10% and reducing reporting turnaround time by 12%.
- Partnered with global stakeholders across L&D, HR analytics, and program owners to define KPIs and convert business questions into scalable reporting solutions.
- Strengthened data validation, reporting accuracy, and governance practices, reducing compliance-related issues by 20%.
- Applied AI-assisted tools (ChatGPT, GitHub Copilot) to accelerate SQL development, dashboard documentation, and ad-hoc analysis.

Visual Artist (IC1) / Assistant Manager – Analytics | NVIDIA Corporation | Hyderabad, India

May 2017 – Feb 2023

- Collaborated with a 35-member technical team to deliver analytics that supported business operations, data security, and governance, contributing to a 15% improvement in data quality and efficiency.
- Mentored a team of 3 analysts in building 5+ analytics products including Tableau dashboards, KPI scorecards, and performance metrics used across business units.
- Designed scalable data models and ETL flows that improved overall data processing efficiency by 10% and reduced data retrieval time by 20%.
- Delivered SQL and Excel training programs to upskill peer analysts, reducing onboarding time and standardizing analytics quality.
- Explored AI-assisted reporting workflows for routine reporting tasks to reduce manual effort and improve consistency.
- Coordinated cross-team priorities and applied process-management frameworks to consistently meet project deadlines.

Data Analyst | Spectrum Consultants | Hyderabad, India

Oct 2016 – May 2017

- Built data reports using advanced Excel and Visual Basic scripting, improving analysis speed and accuracy by 35%.
- Delivered Tableau dashboards across business teams, supporting product decision cycles and increasing stakeholder engagement by 20%.
- Optimized data pipelines and storage solutions, delivering 15+ dashboards and identifying 10 key process improvements that reduced data processing time by 25%.

Software Engineer | GSS Infotech Limited | Hyderabad, India

Jun 2010 – Nov 2012

- Built and maintained SQL-based data pipelines that enabled seamless data extraction and supported data-driven decision-making.
- Partnered with cross-functional teams on requirements gathering, defect tracking, and user-interface improvements.
- Participated in agile delivery, sprint ceremonies, and status reporting to leadership.

EDUCATION

Bachelor of Technology, Instrumentation Engineering V.N.R. Vignana Jyothi Institute of Engineering, Hyderabad, India

CERTIFICATIONS

- Certified Scrum Master — Scrum Alliance
- Data Visualization using Tableau 10 — Edureka
